## PERSONAL STATEMENT

I am a 29 years old 3D Generalist and Motion Designer from Rio de Janeiro (Brazil) living in São Paulo. I have a strong connection with anything related to art, mainly with design, typography and movies.

I have seven years of experience working in design studios, marketing agencies and as a freelance artist. I even had my own studio with two friends. In those years I have developed projects for small business and political campaigns as for huge multinational companies where I learned how to work under pressure, with tight schedules and deadlines, solve conflicts and developed a great sense of teamwork.

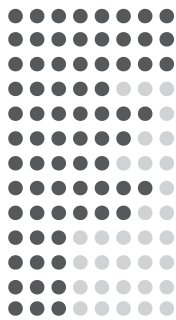

## MY SPECIALITIES
